

**Virginia Backflow Technologies, Inc**

**2009 Irrigation System Backflow Testing**

Special offer to help raise money for BWST!

Loudoun Water requires that all homeowners that operate an irrigation system on their property have the backflow device associated with their irrigation system tested annually. Failure to have the device tested could result in your water being shut off by Loudoun Water.

Virginia Backflow Technologies, Inc. would be happy to provide this testing service to you for the low rate of \$45. You will not find a lower rate for this service in the area. In addition, Virginia Backflow Technologies will donate \$5 for each test performed to the Blue Wave Swim Team.

If you would like to have this test performed by Virginia Backflow Technologies please contact us by email or phone (listed below). Once your irrigation system has been activated this spring please contact us and we will complete the test, forward your test sheet to Loudoun Water and provide a check in the amount of \$5 to the Blue Wave Swim Team.

Thank you for your business and for helping to support BWST. Remember this is a required test that must be completed each year so why not pay the lowest rate and help your swim team at the same time!

Sincerely,

**Virginia Backflow Technologies**
